Item Title: Presentation on drainage related to the new Amazon projects located in the Gateway development between HWY 80 and CR 212.			
How this item ties-in with the City's Mission, Vision and Values: Ensuring public improvements maintain a safe environment and foster quality growth within the community			
Attachments: Supporting Documentation			

**Item Summary:** The Engineering Department is presenting drainage information related to recent storm events that have resulted in residents of the Highland Prairie subdivision expressing concerns that the new Amazon projects have led to increase runoff in the neighborhood. The presentation will demonstrate what the City's Engineering department evaluated when both Amazon DDX7 and Amazon FTW5 were reviewed for plan approval. The presentation will also have information focusing on a few of the properties that were impacted by the recent rain events that are located in the existing Highland Prairie subdivision.
