

NEW FRONT ELEVATION 1/4" = 1'-0"

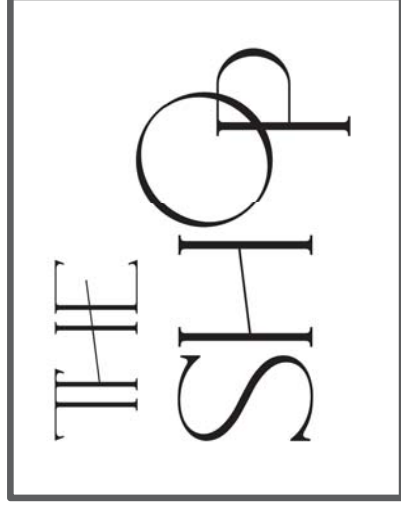

# Exterior Components

The Shop  
112 S Bois D' Arc

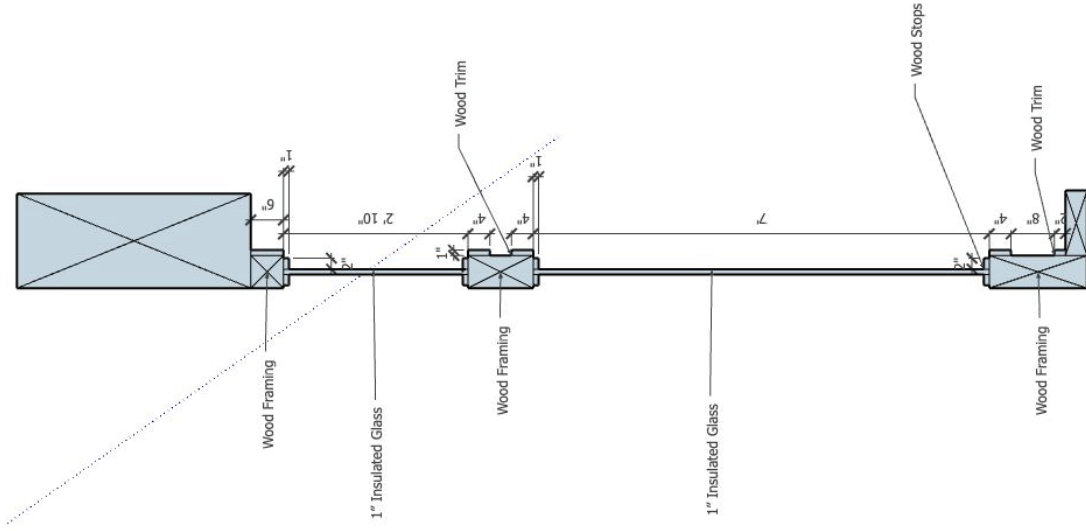

## Sinage

Sign will be out facing installed on a brass metal bar like pictured. Placed on the building at the corner of Main and Bois D' Arc, we will have one on the Bois D' Arc and on the Main side.

# Windows

The windows are all custom and will be boxed in with wood. Here is a cut through drawing showing all materials used to construct the windows. I have attached the cut through drawing as a PDF for closer view. I have also attached the exterior drawing from our architect.

# Door

These photos are inspiration, we are looking for a door like these to retrofit into our storefront. It will be a combination of wood and glass. These photos do not represent paint colors. Only door style.

## Paint

All sides of the exterior will be painted Sherwin Williams Williams Black Magic. Samples will be provided.
